45

/ 100 - AI Visibility: Medium

Content Quality
15%

Technical Access
78%

Market Presence
55%

Score Breakdown (Technical Detail)

Category 1 — AI Citability & Share of Voice

Citability		10/40
Share of Voice		7/10

Category 2 — Crawler & Agent Accessibility

AI Bot Access		20/20
AI Policy File		0/10

Category 3 — Schema & Structured Data

Org Schema		15/15
Content Schema		0/15

Category 4 — Local Sync: KR Platforms

Naver Presence		10/10
KR Platform Sync		5/10

Category 5 — Brand Sentiment & Mention Quality

Brand Mention		0/10
Sentiment Quality		0/10

What is GEO?

Generative Engine Optimization (GEO) makes your business visible to AI systems like ChatGPT, Perplexity, and Claude. When customers ask AI for recommendations, GEO-optimized businesses get cited. This is the next generation of digital marketing.

3 Actions to Improve Your AI Visibility

- 1

웹사이트 루트에 llms.txt 파일 생성 — AI 시스템에 콘텐츠 접근 허용을 명시하는 신규 표준입니다. 5분 내 적용 가능하며 GPTBot, ClaudeBot, PerplexityBot의 콘텐츠 인덱싱을 즉시 개선합니다
- 2

제품/서비스 페이지에 FAQPage JSON-LD 스키마 추가 — ChatGPT, Perplexity가 FAQ를 질의 응답으로 직접 인용합니다. "자주 묻는 질문" 섹션을 구조화 데이터로 마크업하면 AI 가시성이 빠르게 향상됩니다
- 3

주요 페이지(회사 소개, 제품/서비스)에 50단어 이상의 구체적 텍스트 블록 추가 — AI는 구조화된 긴 문단을 인용합니다. 수치, 고객 사례, 기술 사양 등 사실 기반 내용이 AI 인용 빈도를 높입니다

Competitive AI Landscape

When AI is asked about your industry, these competitors are mentioned: 한샘의, 주요, 경쟁사는, 가구, 인테리어.
Is 한샘 cited alongside them? Yes.

Expected Impact After Optimization

Current GEO Score: 45/100
Projected Score: 77/100 (estimated)

Implementation Roadmap & Deliverables

Phase 1 (Week 1): robots.txt + llms.txt + schema.org markup
Phase 2 (Weeks 2-3): Content restructure + FAQ sections + About page rewrite
Phase 3 (Ongoing): Monthly SoV tracking + competitive monitoring + content updates

Included Implementation Files (download from app):

robots.txt	AI crawler allow rules	Website root directory
llms.txt	LLM permissions file	Website root directory
organization_schema.json	Company JSON-LD schema	<head> tag
faqpage_schema.json	FAQ JSON-LD template	<head> tag
implementation_checklist.md	Prioritized action items (Korean)	Internal reference
sov_tracking_queries.txt	Monthly monitoring queries	Monthly SoV check

Next Steps

1. 30-minute strategy call to review these findings

2. Implementation of all recommendations (Phase 1: 1 week)

3. Re-audit in 30 days to measure improvement
